

Masters/Settings Page

As per figma, we created four API's for Settings page

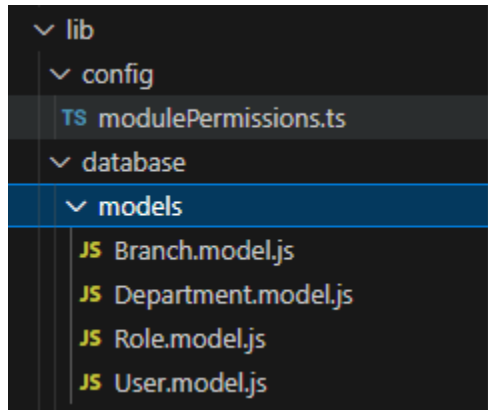

- User
- Roles
- Department
- Branch

Next we would need to create API's and base UI's for the following pages.

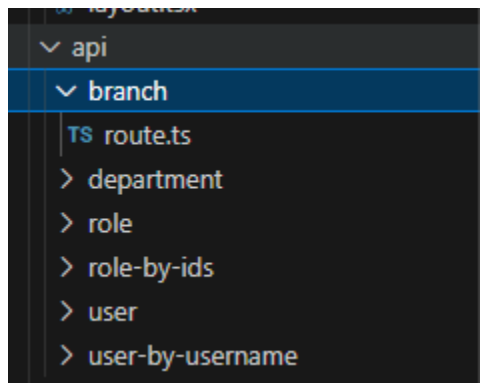

- Location
- Terms & Conditions
- Tax List
- Order Checklist
- Lead Status
- Service Status
- Service Priority Level

We followed the following steps to create API's.

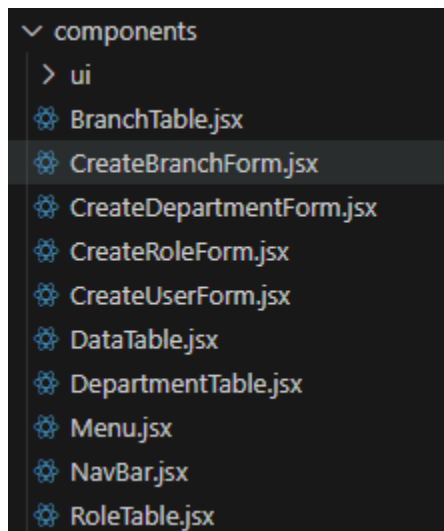

Step 1 : Create Model

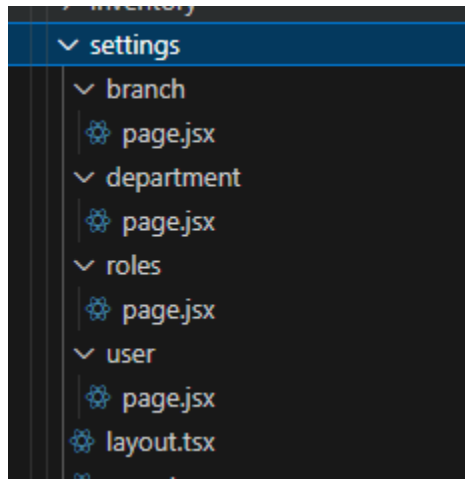

Step 2 : Create API's

Step 3 : Create required components

Step 4 : Integrate in Settings' page

Lets try to finish them by Friday.
